

“Keep the Home Soil Turning” and Win the War!

**Spring Gardening is over, Summer Gardening
“on,” Fall Gardening comes next, and then
comes Winter Gardening**

The Central Garden Committee is the regularly conceded, specially recognized power behind the throne of home gardeners, during this and every other season through the period of the war. Prizes and exhibits, while only incidental, are, nevertheless, the order of the present work, set aside for the rallying of the home garden forces!

As the Garden Committee is back of the gardening movement so a number of public spirited, patriotic citizens are back of the movement for prizes. A number of these men and firms have contributed a list of prizes which are calculated to awaken the ambition of every would-be food producer. And lives there a being with soul so dead, he doesn't want to do this much to help the public weal—be a food-producer if he has only a bean in a flower-pot on the window-ledge.

Charles L. Peck, president of the National War Garden Committee, sums up the whole war question when he said, “The kaiser is much more interested in whether we can feed the men we are sending to the front than he is in the number.”

Miss Gertrude Wright, city garden director, points out that when all things are taken into consideration every garden is really a potential munitions plant. If you are a gardener you have a good opportunity to compete for some of the prizes contributed by the business firms through the Central Garden Committee by sending in your name by Friday and sending your exhibit to the Market House Saturday. If you have a garden you are proud of and are anxious to list it with those eligible to the competition, send in your name and have your garden inspected Saturday.

FOLLOWING IS THE LIST OF PRIZES
